FULL STACK SOFTWARE ENGINEER

React | Next.js | TypeScript | Node.js | Cloud Applications | Product Engineering

CORE SKILLS

- Full-stack web application development
- Requirements analysis & feature breakdown
- React, Next.js, TypeScript, JavaScript
- Node.js, Express.js, REST API development
- Database design and data modeling
- Cloud platforms and deployment workflows
- Testing, debugging, and feature validation
- CI/CD concepts and release readiness
- Agile delivery (Scrum / Kanban principles)
- Technical documentation and knowledge sharing
- System design fundamentals
- Cross-functional collaboration

SUMMARY

Full Stack Software Engineer with hands-on experience designing and building end-to-end web applications across frontend, backend, APIs, databases, and cloud platforms. Experienced translating requirements into working features, validating functionality through testing, and iterating based on technical and user outcomes.

Built customer-facing applications using React, Next.js, TypeScript, Node.js, PostgreSQL, and cloud services while applying structured engineering practices including debugging, deployment, documentation, and cross-functional collaboration.

Engineering professional with 8+ years of experience delivering technical solutions in complex environments, bringing strong problem-solving ability, systems thinking, communication, and ownership mindset into software development.

PROJECTS

TALKIFFY (Real-Time Chat App)

- Built a full-stack real-time messaging system using WebSocket architecture (Socket.IO).
- Translated feature requirements into functional components such as messaging, presence, and delivery status.
- Implemented backend services with Node.js and MongoDB for scalable message handling.
- Developed responsive frontend features with React and real-time UI synchronization.
- Debugged real-time issues such as message consistency, event ordering, and state synchronization.
- Maintained structured Git workflow and iterative development process.

PIZZARIUM (Food Ordering System)

- Built a full-stack transactional ordering system with authentication, payments, and order lifecycle management.
- Implemented server-side validation and pricing logic to ensure data integrity.
- Integrated Stripe payments and Supabase backend services for secure transactions.
- Designed frontend workflows using Next.js and React Query for state synchronization.
- Tested and debugged checkout flow, authentication, and payment processing issues.

TECHNICAL SKILLS

Frontend Development

React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend and Systems Development

Node.js, Express.js, REST APIs, Authentication, Socket.IO, WebSockets

Databases and Data Systems

PostgreSQL, SQL, MongoDB, Supabase

Cloud and Deployment

AWS (RDS), Vercel, Render, CI/CD, Cloudinary

Tools and Libraries

Git, GitHub, Stripe, React Query

PROFESSIONAL EXPERIENCE

Mechanical Design Engineer | ABC Technologies | Toronto, ON

Jul 2022 – Present

- Delivered cross-functional technical solutions requiring technical analysis, system optimization, and engineering problem solving.
- Collaborated across engineering teams to improve execution efficiency and support project delivery.
- Applied structured engineering methodologies transferable to software architecture and system design.
- Contributed to process improvements and technical execution in production environments.

EDUCATION

Master of Science (M.Sc.), Mechanical Engineering
